DOOR ON THE FIRST FLOOR OF SIEBEL CENTER’S GOODWIN STREET ENTRANCE WITH NO OFFICE NUMBER AND DESCRIPTION.
Elevators in Siebel Center has an alarm button for emergency, a fire alarm button, a call for emergency button, and a call for help button. This leads to great confusion as to which button to push for what emergency.
This door in the basement of Siebel center has no door knobs attached to the outer surface. Also there is no indication as to what this room is used for.
POWER OUTLETS AND TELEPHONY JACKS ARE PLACED UNDERNEATH BASEMENT WALKING RAMP IN THE SIEBEL CENTER. DO THEY EXPECT US TO STAND IN THE MIDDLE OF THE RAMP TO USE OUR COMPUTERS?
BASEMENT COMPUTER LAB GIVES NO DIRECTION ABOUT LIGHTING OPTIONS. NO ONE IS SURE WHICH LIGHTS THEY ARE TURNING ON OR OFF.
These buttons trigger the movement of large projection screens for computer labs in the Siebel center basement. Often, people will miss this switch on the wall because it blends into the beige color of the wall and has no text for directions above it.
Thermostats are present throughout Siebel center. While some are placed in the middle of a hallway, no one I know has figured out how to work these things. Assuming central air is being used in this building, why give students false hope that they can change the room temperature?
This door in the basement does not look like a emergency door until you’re about to open it and reads the emergency exit sign. There should have been a EXIT sign placed on top. Once you leave this door, there is no further instruction as to where the actual exit to the outside building is.
In the basement, there are many power plugs that are waistlevel or higher with no table or stands to justify it location. These power plugs would be better served to be at knee level for people who prefer sitting down and not having cables above their heads.
FIRE EXTINGUISHERS IN SIEBEL CENTER LOOK EXACTLY LIKE POWER SWITCHES ALSO PLACED THROUGHOUT SIEBEL CENTER. IN CASE OF EMERGENCY, PEOPLE WOULD NOT RUN TO THIS BOX FOR A FIRE EXTINGUISHER SIMPLY BECAUSE ON FIRST GLANCE IT LOOKS LIKE A SWITCH BOX INSTEAD OF A EXTINGUISHER.
