TELEMEDIA, NETWORKS AND SYSTEMS GROUP

Another tourist trap along the information superhighway.

The TNS research group is headed by David Tenenhouse at the MIT Laboratory for Computer Science. We study systems and strategy issues related to networks, distributed computing, media and telecommunications. In the past year the group has initiated new activities in: wireless networking, active networks and information appliances. Other TNS projects are studying: ATM-based gigabit networking; desk area networks (DAN's); and desktop multimedia.

Although the group designs and builds some of its own hardware, our overall goal is to push software into every nook, cranny, cell-phone, camera and packet we can lay our bits on.

Our five year mission: To boldly code where no code has gone before!

Hi! Well, it looks like you've found my home page. Contained within are some links that I think are pretty neat, as well as some information on some of my eclectic interests. A member of the MIT Class of 1989, I finished my graduate studies in Electrical Engineering and Computer Science at MIT in Cambridge, MA, in 1998. I live in Lexington and enjoy theater, music, photography, art, origami, cooking, hanging out, reading, playing the harp and talking news, business, events and politics. Oh, how could I forget - I LOVE chocolate! After the startup I was working for, NBX Corporation, was bought-out by 3Com, I moved over to Teradyne and then got spun out into Empirix. I am now working for BBN. I am active in the MIT Alumni Association, the MIT Enterprise Forum of Cambridge, and the MIT Club of Boston.

**Links I think are neat**: Travel, Food, Finance, W3C, WWW, People, Photos, Friends, Kids, Education, References, Web 2.0 Pages

The Post Office
Pickup Window

Hello, may I help you?
You have a post card waiting for you?
Yes? You have the claim number with you I hope.
Okay, what is it?
No, don’t tell me. Fill out the form below. Then press the Submit Claim button.
And be patient. I’ve got a lot of piles of mail to look through, you know.

[Submit Claim]

Date: Thu, 13 Apr 1995 14:20:01 -0400

Reply-To:
Subject: Greetings from Cyberspace

There is postcard waiting for you in the Post(card) Office.
You may claim it at the Pickup Window, which is located at
http://postcards.www.media.mit.edu/Postcards/
Your claim number is: 170227
Please have this number available when you claim your postcard.

Thank you,
The Postmaster

Messages left unclaimed after 2 weeks may be discarded.
Collabio
Design Project for Next Thursday

Choice between -
1) Redesigning a dating site experience
2) Designing the resume of the 22nd century

Think about costs to sender and receiver
Look at the quality of the tags/labels, reliability of the tags/labels
How important is reliability to the task at hand? Does it get in the way of the goal?

Define a purpose for your “experience” and design an interface for it.

Questions ?
Group Awareness

• “I could get a visual grasp of argument/conversation successes (i.e. winning others over).”

• “[I would] check if others were agreeing with the point presented, not necessarily by me.”

by Victor Rashed, "Win" (Park City)

This review is from: The Dark Knight (Two-Disc Special Edition + Booklet) (DVD)

What has been said about the Dark Knight cannot be elaborated on -- as I write. The film is molding its way into my #1 favorite comic movie adaptation of all time.

The reason for my review is in hopes of saving you some money. This double disc Special Edition doesn't deliver the price you pay for it. There isn't even deleted scenes!!! I would save your very hard earned dollars and buy the single disc version and wait for the inevitable ULTIMATE re-release that will come later on down the road.

But nonetheless, a great film - you will not be disappointed; I just wish the studio would have given a better Special Edition release than what we have here. So enjoy!

400 of 473 people found the following review helpful:

Christopher Nolan has a vision. And whether you agree with it or not, he undeniably completes it in "The Dark Knight" -- a vicious, engrossing, overwhelming intelligent event film that re-defines 'comic-book-flick'. In Nolan's grim, dark depiction of Gotham-City (the crime-ridden hell protected by legendary superheroes Batman), the director strives to make everything real (something he began in the well-received "Batman Begins"). He makes it plausible, possible. And yet there's more to it: just as 'Begins' was a dissertation of myth, the nature of symbols and heroes, 'Knight' is the escalation of that notion. It's a biblical confrontation of 'good-and-evil', yet as 'good-and-evil' really exist: a conflict of ideals, something that can't be purely-defined but that is relative to a viewpoint. In Nolan's world, the line of utopia and horror isn't crossed...it's non-existent. The bad-guys don't see themselves as bad-guys, and as such something as unerringly-real comes across it might fly past some people's minds (no insult to anybody, it's just common that people don't look deep into 'popcorn-flicks'); the battle is a complete ambiguity.
After purchasing 3 other coffee makers, this coffee maker is charming! This coffee maker makes great-tasting coffee...
